Directives to Owners & Vets of Dogs to be X-Rayed for the GSD Federation of SA Hip & Elbow Dysplasia Scheme

See Section 9 of the Breed Ordinance for full details

1. No litters will be accepted for registration if both sire and dam concerned have not passed the GSDF's official HD scheme or an HD scheme which is recognized by the Federation.
2. No dog or bitch may be graded "V" or higher if they have not passed both the GSDF's official HD and ED Schemes or an HD and ED scheme recognized by the GSDF.
3. The dog to be X-rayed for HD must be at least 12 months old and, together with its original pedigree, may be presented to any Veterinarian. Dogs born as from 01 January 2023 must have their elbows x-rayed as well.
4. Owners must have prospective breeding stock X-rayed well before scheduled matings to ensure that results can be processed timeously.
5. Dogs not registered with the Federation must be registered with the Federation before they are X-rayed since the official Federation Identification Number is the only form of reference and animals not registered with the Federation can therefore not be identified.
6. The Veterinarian, **not the owner**, must complete Form B7 and forward the completed form together with the X-rays to the offices of the Federation (address above). The Federation will forward the X-rays to the official evaluator. Should X-rays be given to the owner, they will be ineligible and will have to be re-taken.
7. The cost of taking X-rays and the postage thereof to the Federation is payable directly to the Veterinarian concerned.
8. Evaluation charges (which includes an administration fee) is payable directly to the Federation and must be paid by the owner immediately after the X-rays have been taken.
9. The official pedigree must be submitted to the Federation by the owner together with the above mentioned evaluation fees. Only when all fees have been paid will the X-ray be read, the results processed and forwarded to the owner.
